SPRING RECEPTION.

Delightful Social Affair Arranged by Willimantic Woman's Club.

The Willimantic Woman's club gave its annual spring reception in the club rooms Tuesday evening. It proved one of the best ever given under the club's cuspices. The rooms were prettily decorated with streamers of two chades of yellow crape paper, cherry oms and potted plants. Mrs. les L. Tryon, Mrs. Edward Tryon. Mrs. F. Wilcox constituted the nittee in charge of the decora-

From 8 to 8.30 o'clack the guests, some 150 in number, were received by Mrs. C. A. Capen, Lessident of the club, assisted by Mrs. A. W. Gates, W. A. Arneld, Miss Laura Chesbro and Mrs. Toyon. During the recep-nusic was furnished by these ers of the Windham High school chestra: Homer Bradbury, planist; awrence Casey, first violin; Harris igelow and Russell Hunt, second vio-1. J. L. 24 TO 75 DEGREES.

o the United States weather report is registered at the voluntary observatory at Bitgood's. The average temperature range was higher and foliage and vegetation about three weeks in advance of where it usually develops to by the first of May.

The maximum temperature for the contractor month was 75 degrees on the 25d; the minimum temperature was 24 degrees on the 13th. So it will be noted that while there was some extraordinarily warm weather during the thirty days,

ster was the guest of local friends amount in 24 hours was 30 on the 19th. There were 17 clear days, 8 partly cloudy days and 5 cloudy days. Killing frosts were noted on the 11th and on the 29th. Phenomena recorded during the month included extreme high winds on the 17th and thunder-

WHITE SLAVE TRAFFIC. Base Woman Lures Two New York

of the happening are willing to give out. The incident is certainly strongly suggestive that the soul-sickening practice of bartering virginity for gold is not confined to glittering New Varieties.

met two girls, so young as to be little more than children. They were trudg-ing along the tiresome way, burdened with such luggage as contained their

possessions.

One of them—the younger, who was about 14 years of age—appeared to have been crying, and the man immediately became interested. To his inquiries as to who they were and where they were going and why their people had not provided means for transportation, they were at first rejuctant to answer except as far as to A large ictant to answer except as far as to say that they were going to Jewett City. That they were tired, distressed and involved in some sort of difficulty was at once patent to the Jewett City man and he invited them to share such small space as his vehicle afforded and ride to their destination. They

Their benefactor gradually learned from their reticent lips the story of how they came to be friendless and without money on a back-country road. They said that they were New

der to make a careful and thorough investigation of the matters set forth in the vote appointing the committee, the committee has found several things to criticise, as will be noted in the following from the text of its report: To the Mayor and Common Council of the City of Putnam:

On January 19 of this year, Mayor Archibald Macdonald, Aldermen John A. Dady, George A. Hawkins, Dr. Omer Larue, and Messrs. B. D. Bugbee and J. F. Carpenter were appointed by the common council a committee to negotiate a contract with the Putnam Water company, with full power and authority to investigate the needs of the city in all respects in relation return and be with them:

The offer was attractive to them and they had agreed to take the places. They had come on from New York to Jewett City and from the latter place had been taken to the "estate" somewhere in Voluntown. The girls could not tell just exactly where the house is, but they said that they were cordially received on the evening of their arrival; that they had been given a good supper and were favorably impressed with their new home. The next morning they made the distracting discovery that they and authority to investigate the needs of the city in all respects in relation to the Putnam Water company in the matter of fire protection and in the matter of both public and private water rentals and the supply of water for public and private uses and the system of piping within the streets of the city and the necessary extension or modifications of the same, and especially the requirements of the city as to hydrants for fire protection with proper pressure at all points to be home. The next morning they made the distracting discovery that they were in a house of immorality and at once made known their intention to leave. And leave they did, but not without many and strong protests from those in charge of the place, nor before they had been relieved of such money as they had. They had walked several miles and were nearly exhausted when they met their friend on the road. Your committee has in part per-formed its duties and begs leave to report as follows:

Experts Required.

their people in New York, telling them of the plight of their daughters, die In order to make a thorough and careful investigation of the matters set forth in the vote appointing the committee, it would be absolutely necnot reach them as promptly as such messages are expected to, so the Jewett City man, acting as guardian of the deluded girls, bought their tickets from Jewett City to their home town and essary for the committee to employ an expert or experts to make the prope ests and to make a thorough investi sent them away, still suffering from the shock of their experiences. Since that time letters from the parents of the girls have reached the Jewett City man, thanking him pro-fusely for the kindly office that he per-

gation of the whole system,
Tests made by inspectors employed
by insurance companies show that, in
the opinion of the inspectors, for a
number of years the town of Putnam
has not been furnished an adequate
supply of water for fire purposes, and
it seems that the weakness of the fire
protection is rectible, attributed to formed and enclosing money to reim-burse him for his expenditures. The startling after-feature of the case is the statement that the arch-flend of a woman who ensuared the girls into protection is partially attributed to insufficiency of pumping capacity, partially to the small size of the distribution mains, and in part to the fact that the amount of water consumed for such a plight is an easern Connecticut domestic purposes has so rapidly in-creased that the water in the stand-pipe lowers very rapidly and during a large part of the day when the pump Telephone Force on New Schedule Important Short Calendar Casesare not running the town is without a sufficient pressure of water for ever a reasonable fire protection.

Water Company Remiss

Tuesday.

"Chris" Leary of Holyoko, catcher for the Pumam team, has arrived in town and is ready for a good season's work. His is a husky makeup, and water which the contract calls for.

"The community with the city in that it has not given the city the head of water which the contract calls for.

"The community with the contract pumping Capacity Needed. The committee is of the opinion that greater pumping capacity is needed; that the piping is insufficient; and that the head of water from the standpipe The outside force of the S. N. E. Telephone company commenced a new echedule of working hours this week. The hours on Monday, Tuesday, Wednesday and Thursday will be from 8 a. m. to 12 m., and from 12.30 to 5.30 p. m. Friday the working time will be from 8 a. m. to 12 m. and from the head of water from the standpipe is, at least for a considerable part of the time, insufficient. In other words, the present plant should be equipped with better pumps of larger capacity, the piping should be improved and en-larged in many places and there should be either a better head from a suffi-cient reservoir, or, in place of addi-tional reservoir capacity, there should be an arrangement whereby pumps of be from 8 a. m. to 12 m., and from 12.30 p. m. to 4.30 p. m. Saturdays the men will labor from 8 a. m. to 12 m., getting the afterfoon off. This schedule will be in force until October be an arrangement whereby pumps of started upon signal, giving an adequate fire pressure, and at the same time it should be made manifestly certain that the system of piping could stand the additional pressure that would be needed to give an edethat would be needed to give an ade-quate supply of water for fires.

Insufficient Pressure.

Supreme Chief Ranger Cosgrove Vie-Taking into consideration the fact that the insurance company experts state that even down around the group stove of Hartford, sead of the For-isters of America, was the guest of Court City of Putnam at a smoker held in Hammond hall Tuesday evening, when members of the courts of the of mills on Pomfret street and south of the same, this being the lowest point in the city where the pressure should be the greatest, there is an insufficient pressure to give an adequate supply for a sufficient number of streams in case of a large fire, the council can readily see that the pres-sure in almost any other portion of the town cannot be called sufficient.

Changes Necessary.

Local Contractors to Be Given Chance The changes necessary to an adequate supply of water for fire protection are therefore, as we have already stated of such complex character and of such importance that this comcommittee on new high school building has made a contract with Edward L Wilson of Boston, the architect who has been employed by the committee, whereby his plans have been accepted provided the building as shown by his plans and specifica-tions can be built within the appro-priation made by the town mittee would not in any event care to assume the responsibility of negotiating a long contract with the Putnam told of his labor among the people in Water company without first obtaining expert assistance in our investigations

What the Tests Show. This committee has caused tests of ie pressure to be made at different

The plans and specifications have already been completed and agreed upon by the committee and have in part been sent out for bids. The bids are to be submitted to the committee on or before May 18, 1910. dates and at different times at many hydrants on different elevations in this city. The tests were made by attach-ing one gauge to a valve on a hydrant The plans and specifications will be sent out for bids in four parts. One part called the general contract, anthe same as you would attach one hose; and even without taking into consideration the friction which the water would have on ordinary hose, we find by our gauge that the water at many points is inadequate even for other the heating and ventilating con-tract, another the plumbing contract, and another the wiring contract; any contractor may bid on any one or more ne hose. In case of a large fire often times six streams would be require and a system of fire protection for thi city should furnish a pressure suffi-cient to handle six streams of water at one time. Your committee is sat-isfied that in most places within this ty even four streams of water with efficient pressure for our large buildsufficient pressure for our large build-ings cannot receive the proper pres-sure at one time, and more especially as the depth of the water decreases in the standpipe from being rapidly drawn upon by streams used at fires. The committee is also of the opinion that at many hydrants in the city there is practically no fire protection from the use of water through hose from the hydrants, and we are of the opinion that provision for proper fire pressure should so be arranged that the whole city should receive and have at all times rapid fire protection.

A Vital Question.

The question has become a large question and one of vital importance to the community. The rates for private rentals charged by the Putnam Water company are, in the opinion of the committee, exorbitant and quite unusual, and should be reduced to a very considerable extent and that this reduction would affect favorably nearly every householder in this city and by every householder in this city and be a tremendous saving to the indi-viduals who use public water. On the 28th day of April this comnittee held a meeting at which our litizens were invited to appear before committee. At that meeting very strong arguments were made in favor of the installation of a public water system by the city in order that the water with adequate system by the city in order that the city may furnish a pure supply of water with adequate fire protection, and so much was said by very prominent men among our very largest taxpayers and real estate owners, and so much has been said since that time to the several members of the committee, that the committee is in doubt as to be the committee its investiwhether it should continue its investigations of the water plant and its ne

contations with the Putnam Water company until the question shall be leckled as to whether the city is to nstall or purchase a water plant of A short time ago a committee was appointed by the direction of the mayor and common council to considmayor and common council to consider the questions of public sewers, and a part of the duties of that committee are to consider the question of the advisability of the installation by the city of a public water system of its own or the purchase by said city of the plant of the Putnam Water company.

tribution Mains too Small-Supply Two Committees Not Desirable. If it be the fact that the voters of the city of Putnam are in favor of mon owning a public water system of their own, then tiffs committee is of the opinion that it should be relieved of its duties, at least for the time below-ould mittee shal report to the council as or-

Gauge Imperative.

The committee begs leave to earnestly recommend that a recording pressure gauge be immediately placed either in the headquarters of the fire department or some other proper place in the city, so that the council shall know what the pressure shall be at all times until this whole matter is adjusted, with the suggestion that if this is done it will be an incentive to the water company to make a larger expenditure in the running of its pumps more hours of the day and night, so that the water pressure shall night, so that the water pressure shall at least be more adequate to the sit-uation until the whole matter is finally

JEWETT CITY

TALK ON MISSIONS Given by Miss Lucy Baldwin at Home of Mrs. L. A. Panton.

An interesting missionary meeting was held at the home of Mrs. L. A. Panton Tuesday afternoon. In the absence of the president, Mrs. G. W. Robinson, President Emeritus Mrs. H. B. Stum presided. After devotional exercises, a tribute to Miss Soule was read by the secretary, Mrs. H. N. Wheelock, Following this there was a talk on the liner life of people in mission lands, by Miss Lucy Baldwin, who held the close attention of the ladies for about half an hour, citing circumstances from the lives of people circumstances from the lives of people in mission lands who have accepted Christlanity, showing their courage, faithfulness under persecution, kindness towards enemies. She gave a marked contrast between two villages where Christlanity and hear preached. where Christianity had been preached in one of which nearly all the people returned to their old ways, and in another they remained true to gospel teachings. She also mentioned the proposed plans of lightening the crushing burden of the people of the Congo country, under the reforms of King Albert and his ministry, so soon to be put into effect. A better view of the people of mission lands means better praying in their behalf. It has been aptly said of our efforts in the mission requires two aptly said of our efforts in the missionary cause, "Our boat requires two cars, one of labor and one of prayer." She gave the following quotation from a sermón on the Lord's Prayer, written by the Rev. James A. Francis: "After any prayer has crossed every continent, and every far-flung island of the sea, after it has taken in the entire wish and purpose of God for the race, only after this am I taught to ask for a piece of bread for myself." She told of the missionary exposition which the churches of Greater Boston are uniting to hold in that city one year from now, when we can have a view, close at hand, of many things belonging to mission fields.

Mrs. M. L. Grant read a letter from Rev. G. N. Edwards to Miss Mary E. Soule, which was received the day be-

Soule, which was received the day be fore her death. Mr. and Mrs. Ed fore her death. Mr. and Mrs. Ed-wards are located at Douglas, Alaska. The letter was full of interesting descriptions of the beautiful country told of his labor among the people in the church of which he has charge. He organized a men's club of sixty members. The Knights of King Arthur among the boys has a large class, the Sunday school Mrs. Edawrds has formed an art class and a literary so-clety. Mr. Edwards has charge of the First Congregational church in Duglal, about twelve years ago.

The meeting closed with the Mizpah

MYSTIC

Congregational Society's Prosperou Year-Faithful Work of Rev. A. F. Earnshaw-Busy Summer for Ninigret Mills.

The annual meeting of the Mysti Bridge Congregational church was held Monday evening in the parish house and was largely attended. The finanand was largely attended. The financial department of the church was
found to be in better condition than
for years and that the church was free
from debt. Resolutions were adopted
on the death of Henry B. Noyes, elerk
of the church for thirty-four years.
The following officers were elected for
another year: Clerk, Edwin B. Noyes,
treasurer, Albert Denison; church
committee, Benjamin L. Holmes,
Charles E. Wheeler and John W. McDonald. The church members showed
appreciation of their pastor, Rev. A.
F. Earnshaw, who has done such good
work while among them. while among them.

York girls, not sisters one of them being 14 and the other 16. A few days before they had made an agreement with a woman, who had been represented to them as being wealthly to come out on her country estate to take places that would give them desirable occupation and not be difficult to fill. They were also told that the woman was just about to make a trip be necessary to employ experts in or-

the city to own a system of water works of its own.

We therefore submit this report of our opinion upon the present condition of the water works system of the Putnam Water company, and our suggestions as to the inadvisability of the continuance by this committee at this time of its investigations until the other committee has reported, for the consideration of the council; this committee will be glad to act and complete its duties if the council shall so direct, or will refrain from action for the time being if the council shall deem best.
